PROJECT WORK

UNCOVERING FURNITURE SALES INSIGHTS

TECHNOLOGIES USED: JUPYTER, PYTHON, EXCEL

- Navigating through a sea of 30,000 sales records, I embarked on a journey of data exploration, meticulously cleaning and transforming every detail to unveil hidden insights

- With a keen eye for patterns and anomalies, I delved into the depths of my dataset, sculpting it into a canvas of visualization that painted a vivid picture of sales trends and customer behavior.

- Transforming raw data into actionable intelligence, my project on Exploratory Data Analysis breathed life into numbers, revealing the story behind each transaction and paving the way for informed decision-making.

HOSPITAL MANEGEMENT SYSTEM

- Spearheaded the development of a cutting-edge Hospital Desktop Application using Java, MySQL, AWT, and Swing, delivering exceptional functionality and user experience for hospital administrators and receptionists.

- Masterfully managed employee data for administrators and supervised receptionists in handling patient details, admissions, and precise ward allocation.

- As an admin, executed sophisticated CRUD operations for employee management with unparalleled efficiency. Receptionists managed diverse patient data and ward logistics with ease.

- Demonstrated exceptional expertise in utilizing Java, MySQL, AWT, and Swing to create a highly intuitive and functional interface that significantly enhanced hospital efficiency in administrative, receptionist, and patient management tasks.

ACHIEVEMENTS
- Awarded cash reward for achieving second rank in senior secondary
- Achieved AIR 1064 in NIMCET 2023
- Achieved AIR 816 in CMAT 2022
- Achieved 90%tile in Quant Section of XAT 2024
- Achieved 93%tile in Quant Section of CAT 2022
